

Creating Replit and Pastebin accounts

You will need an email address that you can access on the computer you are currently using. (Important if you are using a school or public computer).

It is free and easy to create a Gmail account. If you are a parent/carer then you should set this up on your child's behalf, but the password for the account should be known to them, as they will need it to login to replit.com using their Google account or go to gmail to verify an account setup with a different username/password

Use the browser of your choice and go to <https://replit.com/>

Click the button "Sign up for free":

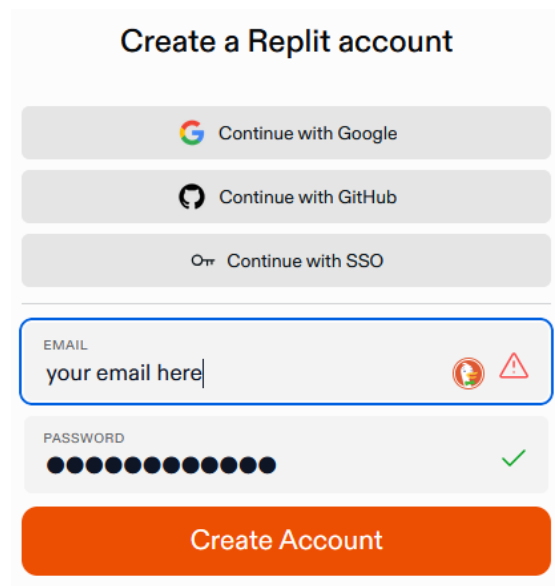

If you have a gmail account, you can use it here to "Continue with Google". You must know the password!

If you want to use a separate username/password then follow below:

Type your email address and a password.

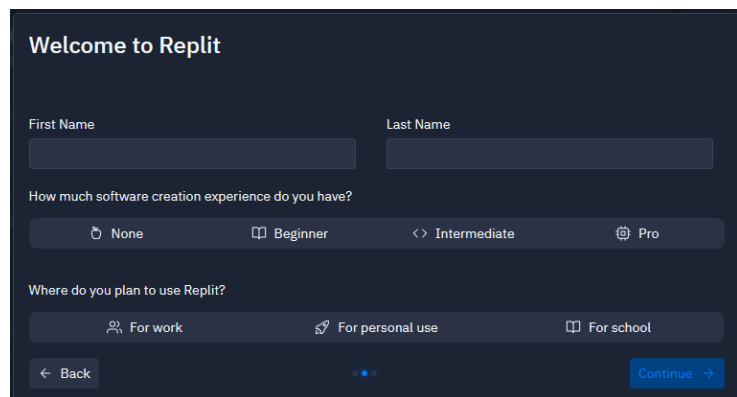

Make sure you remember / write down your password!

Click "Create Account"

A screenshot of the 'Create a Replit account' form. At the top, the title 'Create a Replit account' is centered. Below it are three buttons: 'Continue with Google' (with a Google logo), 'Continue with GitHub' (with a GitHub logo), and 'Or Continue with SSO'. Below these buttons are two input fields. The first is labeled 'EMAIL' and contains the placeholder text 'your email here'; it has a red warning icon on the right. The second is labeled 'PASSWORD' and shows a series of black dots for the password, with a green checkmark on the right. At the bottom is a large orange button labeled 'Create Account'.

Fill in your name and click on the relevant buttons for experience and usage. (Either personal or school)

Click “Continue”

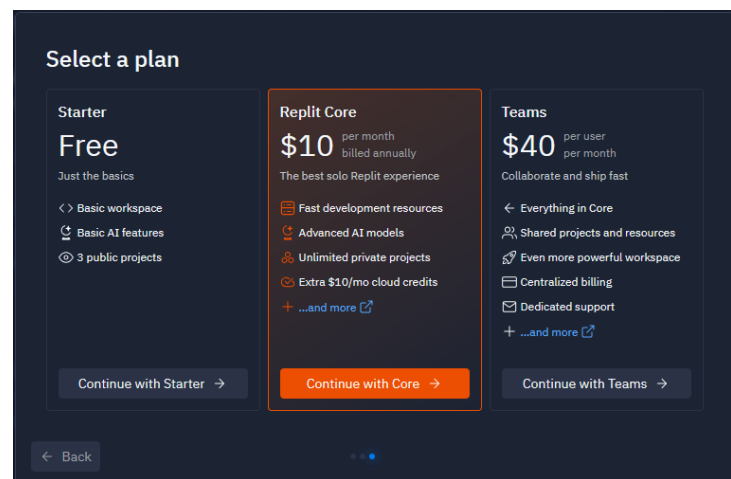

The registration form is titled "Welcome to Replit". It contains fields for "First Name" and "Last Name". Below these is a question "How much software creation experience do you have?" with four radio button options: "None", "Beginner", "Intermediate", and "Pro". The next section is "Where do you plan to use Replit?" with three radio button options: "For work", "For personal use", and "For school". At the bottom are "Back" and "Continue" buttons.

IMPORTANT!

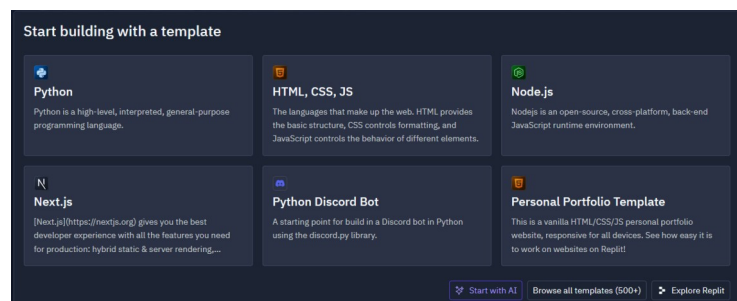

Click on “Continue with Starter”

The button is under the “Free” heading

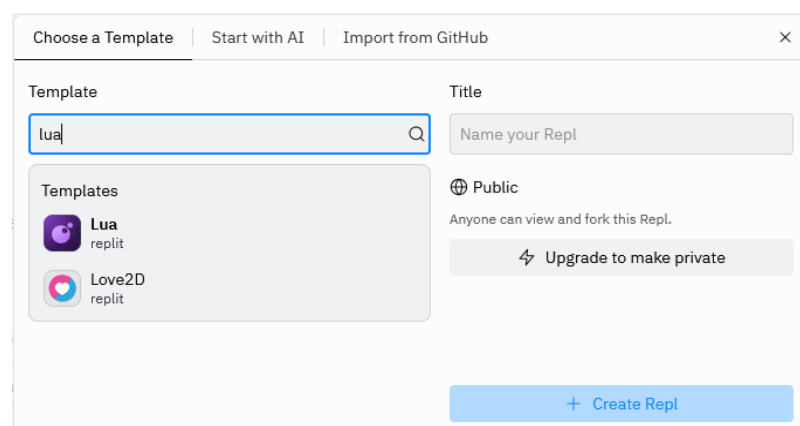

The "Select a plan" screen shows three options: "Starter Free", "Replit Core \$10 per month", and "Teams \$40 per user". The "Starter Free" option is highlighted with a blue border. It lists features: "Basic workspace", "Basic AI features", and "3 public projects". The "Continue with Starter" button is at the bottom of this section. The "Replit Core" and "Teams" sections also list features and have their respective "Continue" buttons.

Click on “Browse all templates (500+)”
(Lower part of the window)

The "Start building with a template" screen displays a grid of template cards. The cards include: "Python", "HTML, CSS, JS", "Node.js", "Next.js", "Python Discord Bot", and "Personal Portfolio Template". At the bottom right, there is a button labeled "Browse all templates (500+)" and an "Explore Replit" link.

Type “Lua” into the search bar
Click “Lua” on the drop-down.

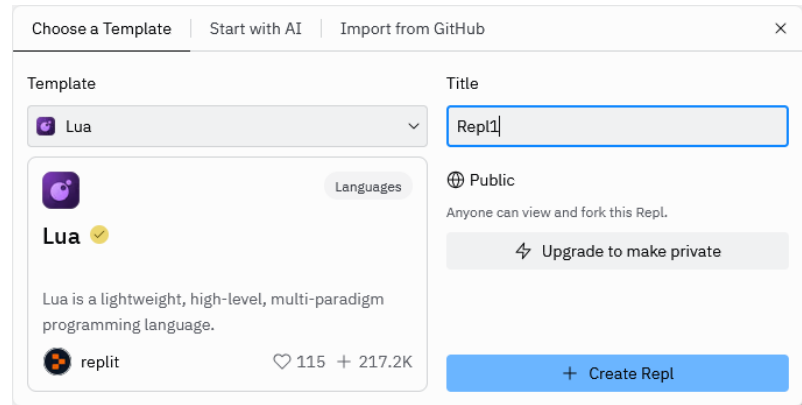

The "Choose a Template" modal shows a search bar with "lua" entered. Below the search bar is a list of templates: "Lua replit" and "Love2D replit". To the right, there is a "Title" field with the placeholder "Name your Repl", a "Public" checkbox, and an "Upgrade to make private" button. At the bottom right is a large blue button labeled "+ Create Repl".

Change the title to:
"Repl1"

They will constantly try to get
you to "Upgrade"

which means "Pay For"
Do not be tempted!

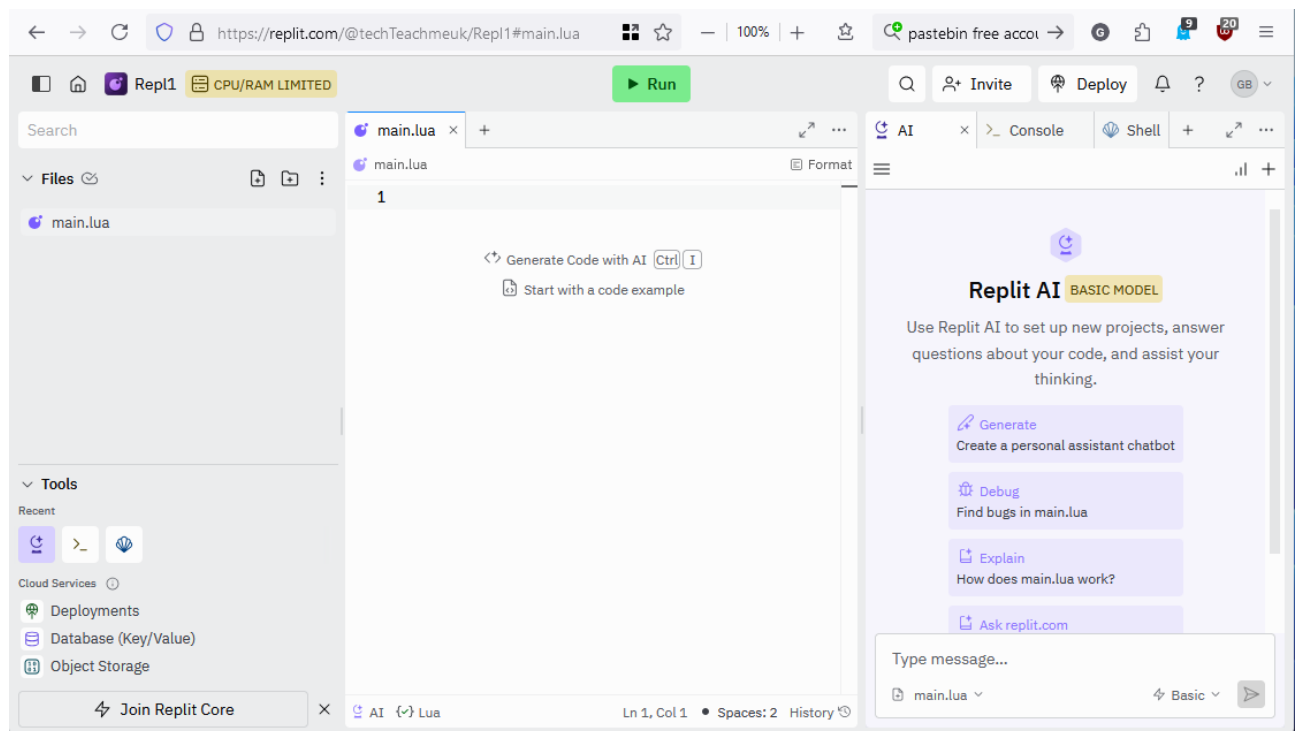

Click "Create Repl"

You will now be taken to your newly created project. You can click along with the
"Welcome to the workspace" tutorial if you wish.

Please DO NOT use the Replit AI. You are doing this to learn Lua. When you are a
master of the language you can then use AI and be able to determine whether the
code it creates is workable, or can be adapted for your purposes.

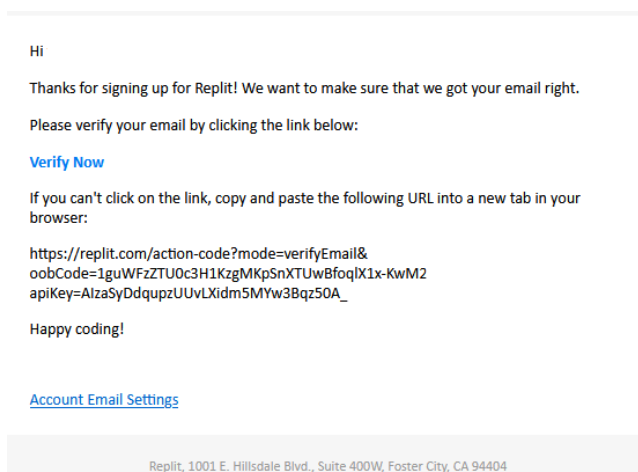

The code window is now ready to use.

Check your email:

Click on the “Verify Now” link

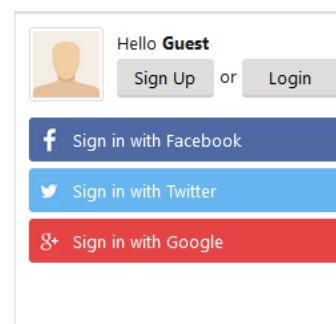

(The text in this screenshot has been modified, so will not work!)

Pastebin

Go to <https://pastebin.com/> and click the “Sign Up” button

You can use your gmail account if you wish
“Sign in with Google”

To use a different username / password:

Enter a username.

If already in use, you will
be warned.

Enter email and password.

Agree to TOS

Fill in the CAPTCHA

Click the “Create My
Account” button

A screenshot of the Pastebin Sign Up Page. The page has a dark blue header with the "PASTEBIN" logo and links for "API", "TOOLS", "FAQ", and a green "+ paste" button. Below the header, it says "Sign Up Page" and "Join the Pastebin community with over 4,000,000 members!". There are three social login buttons: "Sign in with Facebook", "Sign in with Twitter", and "Sign in with Google". Below these is a "OR" separator. The main form has fields for "Username:", "Email Address:", and "Password:". The "Username:" field has a green message "Username OK!". The "Email Address:" field has a ".com" domain and a red warning icon. The "Password:" field has a red warning icon. Below the form, there is a checkbox "I agree to the terms of service, default notification settings and privacy statement." and a CAPTCHA image showing the text "SRDR6M" and "SADROM". At the bottom is a "Create My Account" button. On the right side, there is a "RELATED PAGES" section with links: "Create New Account?", "Forgot Username?", "Forgot Password?", and "No Activation Mail?".

Go to your email and click the verify link.
