Guide to creating a new Repl.it account

You will need an email address that you can access on the computer you are currently using. (Important if you are using a school or public computer)
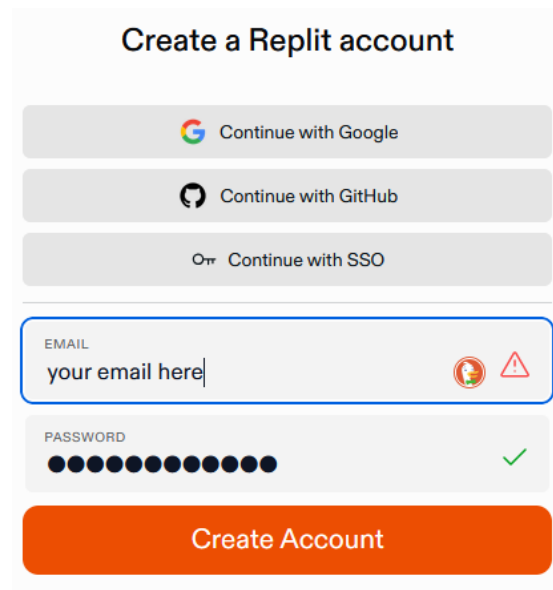

Use the browser of your choice and go to https://replit.com/

Click the button "Sign up for free":

Type your email address and a password.

Make sure you remember / write down your password!

Click "Create Account"

Fill in your name and click on the relevant buttons for experience and usage. (Either personal or school)

Click "Continue"

IMPORTANT!
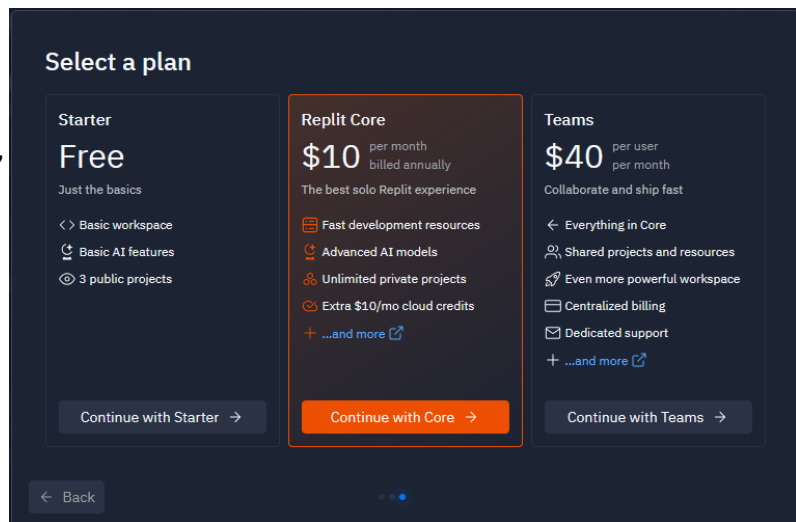

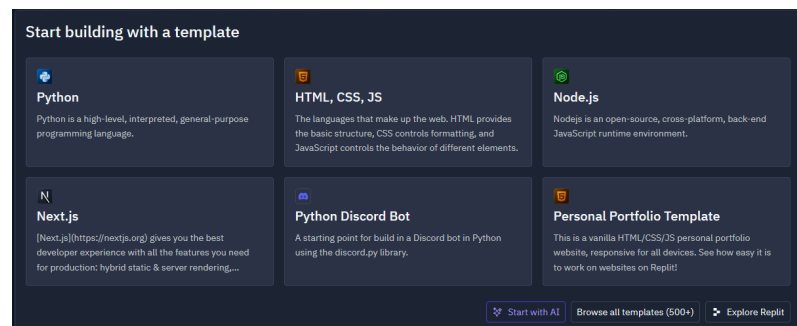

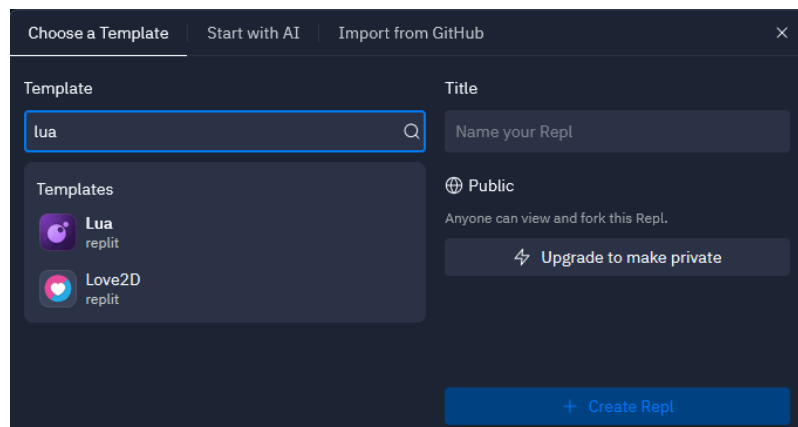

Click on "Continue with Starter"

The button is under the "Free"

heading

Click on
"Browse all templates (500+)"

(Lower part of the window)

Type "Lua" into the search bar
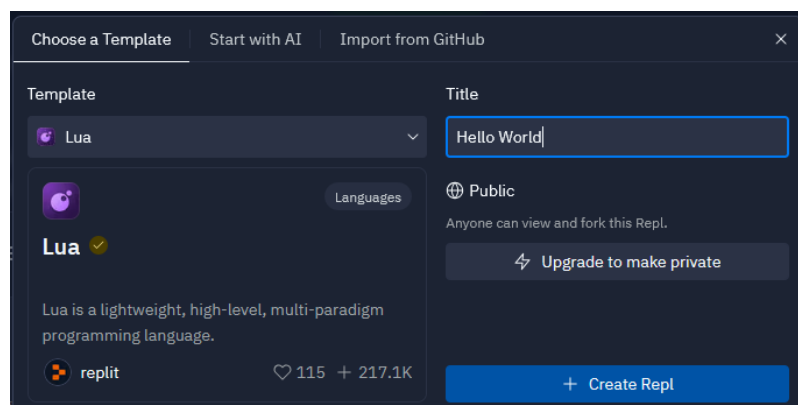

Click "Lua" on the drop-down.

Change the title to:
 "Hello World"

They will constantly try to get
you to "Upgrade"
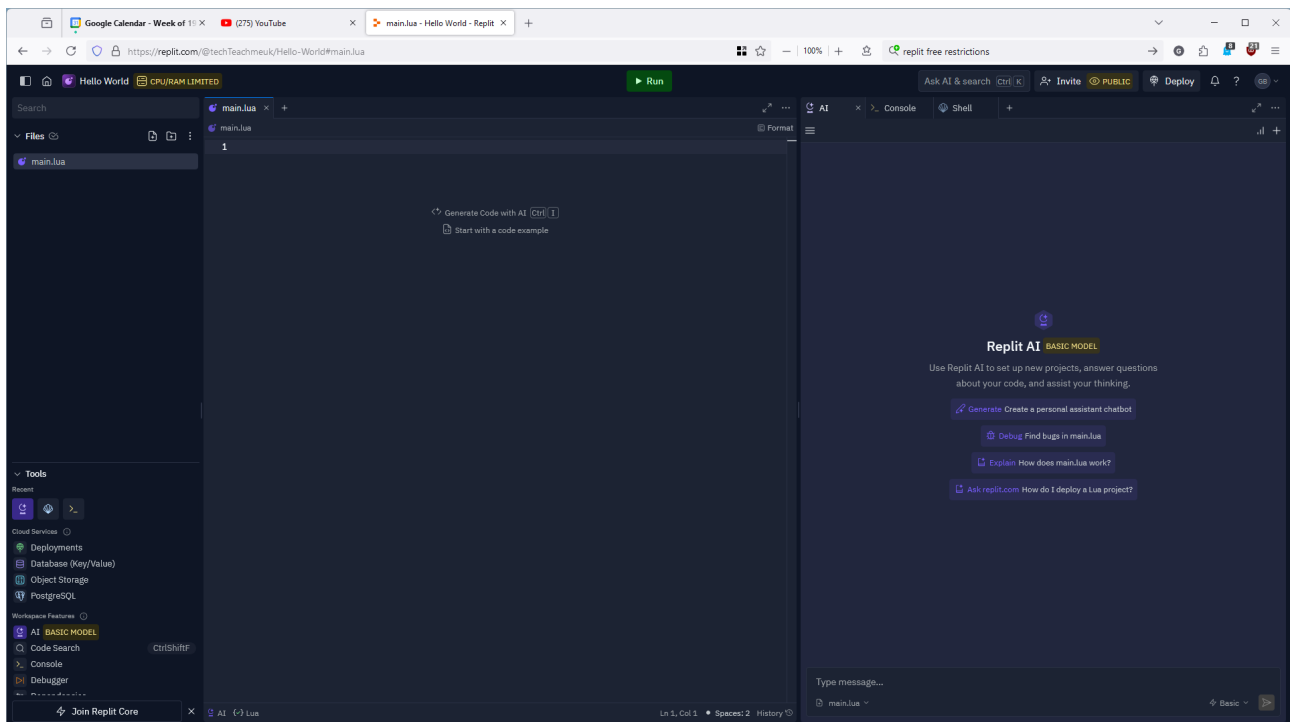

which means "Pay For"
Do not be tempted!

Click "Create Repl"

You will now be taken to your newly created project. You can click along with the "Welcome to the workspace" tutorial if you wish.

Please DO NOT use the Replit AI. You are doing this to learn Lua. When you are a master of the language you can then use AI and be able to determine whether the code it creates is workable, or can be adapted for your purposes.

The code window is now ready to use.

Check your email:

Click on the "Verify Now" link

(The text in this screenshot has been modified, so will not work!)

Hi

Thanks for signing up for Replit! We want to make sure that we got your email right.

Please verify your email by clicking the link below:

Verify Now

If you can't click on the link, copy and paste the following URL into a new tab in your browser:

https://replit.com/action-code?mode=verifyEmail&
oobCode=1guWFzZTU0c3H1KzgMKpSnXTUwBfoqlX1x-KwM2
apiKey=AIzaSyDdqupzUUvLXidm5MYw3Bqz50A_

Happy coding!
